## FOR IMMEDIATE RELEASE

###

# EarMaster Releases EarMaster 7.1 on PC and Mac

EarMaster ApS just released a major update 7.1 for its award-winning music theory and ear training software EarMaster 7. EarMaster 7.1 is free for all EarMaster 7 licensees on PC and Mac and adds dozens of new features and improvements.

Egaa, Denmark, January 10, 2019 – EarMaster ApS have just released EarMaster 7.1, a major update for their music theory and ear training software on PC and Mac. EarMaster 7.1 is a free update for EarMaster 7 users. It includes many under-the-hood improvements and new features.

### CLAP RHYTHMS INTO A MICROPHONE

Upon overwhelming popular demand, microphone input for rhythm clapping exercises has finally been added to EarMaster 7! Users can now complete their rhythmic sight-reading and rhythm clap-back exercises by clapping their hands in front of a microphone. The software, thanks to its exclusive audio detection algorithms, will analyze the recorded claps and give the user a detailed feedback on his performance.

### 445 NEW CLASSICAL MUSIC SCORES

EarMaster's Score Library now includes over 445 scores for Classical music, including works by Bach, Mozart, Haydn, Monteverdi and many more. These scores have been added in collaboration with the French *Conservatoire National des Arts et Métiers* (CNAM) and their excellent music library project *NEUMA*.

These scores can be used for any melodic ear training, sight-singing or rhythmic training exercise in EarMaster 7. For example, users can train to sight-sing 4-part Bach chorales by singing their voice while being accompanied by the other 3 voices. The software will analyze the user's sung notes in real-time and give a detailed evaluation of the user's pitch and rhythmic accuracy.

*"I needed a way to get students to practice sight singing regularly and on their own, and EarMaster has been very effective for that purpose. The program does a much better job of detecting and accurately evaluating singing than did the other software I had been using previously [...]."*

Daniel Goldberg, Assistant Professor in Residence of Music Theory, University of Connecticut, USA

### CZECH TRANSLATION AVAILABLE

With EarMaster 7.1, EarMaster now also becomes available in Czech, bringing the total number of available languages to 9: English, German, French, Chinese, Spanish, Italian, Danish, Portuguese, and Czech.

### MUSICXML IMPORT NOW SUPPORTS DYNAMICS

EarMaster now imports and interprets both the general sound dynamics values and the individual note dynamics values included in MusicXML files. This enables a smoother, more musical and nuanced playback of scores.

*pp*

### AVAILABILITY

EarMaster 7.1 is a free update for all EarMaster 7 users on PC and Mac. To obtain it, users must start EarMaster while connected to the internet and follow the on-screen instructions.

EarMaster 5 or EarMaster 6 licensees can also seize the occasion to upgrade to the new version 7.1 for half the price of a regular license: 30€ instead of 59.95€ (including VAT) in the EU or US\$ 30 instead of US\$ 59.95 (+ tax) in the rest of the world.

*"I have been a big EarMaster fan for many years!"*

Damien Nolan, Guitarist for Pete Townshend (The Who), Skunk Anansie, VV Brown, Katie Melua and more.

### ABOUT EARMMASTER

EarMaster ApS is a Danish music software company founded in 1994 and located in the city Aarhus, also dubbed as 'the city of smiles.' What drives the EarMaster company is a passion for music in all its shapes and colors. Our mission: develop the best software possible to help improve music education. In 2017, EarMaster was nominated for a NAMM TEC Award in the *Best Educational Tool* category, and is currently a finalist for the 2019 Music Teacher Awards for Excellence which will be held in March 2019 in London (UK).
